

pay some real attention here - it should not be the domain of the nab to tell me what information i can receive on xm radio - i pay for the service and get valuable and detailed information - and therefore do not need them or anyone telling me what i should hear and what i should not - enough with the the air police telling me what to do - if you really want to do some good why don't you tell those people to work on their own specific problems before they try policing the ariways - reject their request.
